Policies

Standardized policies and principles guides your workflow, helping achieve clarity, transparency, and consistency in your operation.

People

We value people working with us by creating a productive & minimum-stress environment. Progress lies in your team's adoption of the vision.

[See Solutions](#)

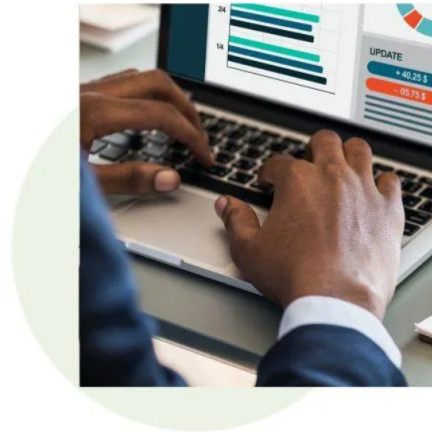

1. Free Discovery Call:

You will schedule a free 15-minute consultation with a Strategy Consultant to get started. This is a simple, no-fuss starting point where you can tell us about your business and your goals. This will lay the foundation of a fruitful partnership and provide us both with valuable insights.

2. Audit

After your discovery call, we'll conduct a thorough audit (like a history and diagnosis) to pinpoint strengths, weaknesses, and growth opportunities. This provides a base for the next step, where we provide you with the blueprint of strategic options.

3. Strategic Options

The audit is transformed into key insights about your business, and using those key insights, we will lay out an array of actionable researched strategies tailored to bring your desired outcome. For example; the expansion of your business, the streamlining of a particular function or a solution to a business problem that you have encountered. These options ultimately lead to an increase in sales or revenue which starts with your strategic choice.

4. Making the Choice & Onboarding the Team:

From the developed strategic options, we will support you as you determine the best one for your business. Once you make the choice of the right strategic option for you, it's time for you to officially have us on-board and start working on the plans we devised together. This is where we also start working with the team. From implementation of the strategy to witnessing the change happening in real time, we aim to provide you a premium consulting, management, and training experience.

TESTIMONIALS

Get Inspired By what our clients:
shared about us

"Very positive: The rigour and detail around the development of the strategic plan; the energy and new ideas brought to management engagement (e.g. management meetings); Culture Carriers initiative; focus/drive on defining work plans and performance management discipline even in the face of inertia/headwinds in the organization."

Paul Barnes

Co founder / Director, Northpoint

Chadderton Research and Development offers strategic business advisory services to optimize operations for future business growth.
